Introducing EcoSilence Drive to Bosch hoods so you can relax in a quieter kitchen.

## Loads better for a perfect sparkle

Learn about VarioFlex Pro basket systems for maximum flexibility and brilliant dishwashing results.

**BOSCH**

Invented for life

# Who are Bosch?

## Meet Karl...

...the Bosch Engineer

Karl has devoted his working life to Bosch and has helped us design new products, develop new technologies and ensure that feedback from customers continues to help shape our products of the future.

His detailed knowledge of our products and long experience can now, for the first time, be accessed by customers who are looking to purchase a new appliance.

In each section throughout this brochure – home laundry, dishwashers and refrigeration – **Karl has written a useful Q&A guide that identifies the most important factors you should consider when purchasing a new appliance.**

“I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit.”

Robert Bosch, 1921

For over 125 years, the Bosch name has been synonymous with engineering excellence. Our home appliances are renowned for their quality, reliability and performance which derives from our inherent, unflagging commitment and the painstaking thoroughness with which every unit is made. As you would expect from German engineering, there are no gimmicks or frills with our products – just pure, clean lines and beautiful, functional simplicity that will enhance any kitchen.

For the fourth year running, **Bosch has received a prestigious Which? Award – Best Home Appliance Brand for 2014.** Our success is the fifth time in six years that we have received a coveted Which? Award that independently recognises

Bosch’s outstanding quality and customer experience. No other brand has won this accolade as many times and four years running is a record.

The values that shaped Robert Bosch’s vision for his new company in 1886 are the same principles that guide the business today; never lose the trust of your customers, look after your staff and partners and change things for the better. It’s what has kept Bosch at the forefront of the home appliance industry and what will keep it there in the future.

# Service you can depend on.

For help with your home appliance,  
trust Bosch Customer Service.

## Arrange an engineer visit.

Our appliances are manufactured to the highest standards, but if you do need a visit from an engineer we are here to help. We have teams of locally based engineers around the country – employed and trained by Bosch\*. This gives them unrivalled expertise and knowledge of our appliances. We repair appliances both in and out of guarantee. All repairs are analysed in advance by a technical team so that the parts likely to be needed to complete the repair are sent to the engineer's van the night before the visit.

To arrange an engineer visit to your home please call:

**0344 892 8979**

Lines are open 24 hours.

You can also arrange an engineer visit online by visiting:

[www.bosch-home.co.uk/bookonline](http://www.bosch-home.co.uk/bookonline)

## Product advice.

If you need help using programmes or features, or need assistance selecting a new Bosch appliance from our current range, our product advice team can help.

You can call us on **0344 892 8979** or visit:

[www.bosch-home.co.uk](http://www.bosch-home.co.uk) for frequently asked questions and help videos.

## Register my appliance

We advise that you register your appliances so that we have full records in the event of needing to contact you about a product update. Visit [www.registermyappliance.org.uk](http://www.registermyappliance.org.uk) for more information.

## Visit the Bosch online store.

Find a comprehensive selection of accessories to help you get the most out of your appliance, along with our full range of replacement spare parts and cleaning and care products at the Bosch online store.

You can also purchase Tassimo hot drinks machines, vacuum cleaners, irons, steam stations, kettles, toasters and food preparation appliances directly from us online.

You can call us on **0344 892 8979** or visit: [www.bosch-home.co.uk/store](http://www.bosch-home.co.uk/store)

Calls will be answered 24 hours a day, seven days a week.  
You can contact our specialist advisors Monday to Friday  
8am to 8pm, Saturday 8am to 4pm and Sunday 9am to 3pm.

### **Accessories.**

Many appliances can be enhanced with optional extras, such as telescopic rails for ovens or special cookware for hobs.

When buying a Bosch home appliance, you know you are purchasing a quality, reliable product. However many appliances are used daily, so need cleaning and maintaining to keep them looking great and operating at peak performance.

Every one of our cleaning and care products has been thoroughly tested and approved for safe and effective use on your Bosch home appliance.

### **Replacement spare parts.**

We keep in stock a comprehensive range of replacement spare parts for our appliances for up to ten years. All our parts are original spare parts, not copies.

### **Highly commended service.**

Bosch Customer Service is proud to be recognised in the Domestic and General Total Excellence and Quality awards. These prestigious awards are voted for by our customers.

In our latest results 94.6%\*\* of customers said our service was excellent or good. This meant Bosch received the Highly Commended accolade.

\* In some remote areas we may use an approved service partner where the repair process may vary.

\*\* Domestic and General Survey 2014.

Calls are charged at the basic rate. Please check with your telephone service provider for exact charges.

# Sustainably produced. Economical in use.

One of our guiding principles has been to design new technologies that save our customers time and effort, but also save energy and natural resources to minimise the impact of modern lifestyles on the environment.

## Oven – Hotair Eco

Cooking on one shelf? Then save energy and select the Hotair Eco programme. It's ideal for one shelf meals like lasagne, shepherd's pie and casseroles. You get exactly the same results as normal, just with 30% less energy\*.

\*30% more economical (0.66kWh) than the maximum value (0.99kWh) allowed for energy efficiency class A (measured in accordance with EN 50304).

You can easily identify our most sustainable and energy efficient products throughout this brochure as they will have a 'Green Technology inside' symbol displayed next to them.

The difference that Green Technology can make in helping you live an easier, more convenient and more sustainable life can be seen in all of our appliances.

**Fridge freezer A++**

Our A++ energy rated fridge freezers, which are available from our Serie 6 range, cost as little as £35 per year\*\* to run in electricity.

**Dishwasher – AquaStar**

AquaStar dishwashers use just 6.5 litres of water (that's less than a sink full) to clean 13 place settings for a three-course meal.

\*\*Based on KIS87AF30G using 226kWh as stated on the EU energy certificate at £0.154 per kWh.

# Ovens.

Using the highest quality stainless steel and glass, our ovens and compact appliances combine beautifully to deliver a timeless, elegant and stylish finish to any kitchen with sleek, co-ordinated lines and matching panels.

## Serie | 8 ●●●●

### Our premium range.

Impressive technology and design. From their elegant design and crystal clear TFT touch display the range of Serie 8 ovens meet every need and more in the kitchen. The innovative control wheel provides convenience and functionality with full control over your dishes at all times. Plus, thanks to sensor-controlled programmes, you'll achieve perfect results every time.

## Serie | 6 ●●●●○

### Our essential range.

Simple elegance meets superior technology. Serie 6 ovens give you more than just convenient operation and maximum energy efficiency. Modern functionality means your oven is easy to use with various programmes to suit various foods, all available to view clearly on the large LED display.

## Serie | 4 ●●●○○

### Our practical model.

Modern design, quality engineering and practicality. The Serie 4 compact microwave oven looks stunning inside and out. Microwave technology makes it easier for you and the family to cook.

To view our full range of ovens, visit [www.bosch-home.co.uk](http://www.bosch-home.co.uk)

Single ovens

Double ovens

Compact ovens

\*30% more economical (0.66kWh) than the maximum value (0.99kWh) allowed for energy efficiency class A (measured in accordance with EN 50304).

# For perfect results, you'll need the right kind of heat.

Truly perfect baking and roasting requires not only the ideal temperature, but also the appropriate heating mode. From 4D Hotair to Hotair Eco, Serie 8 ovens offer up to 15 different heating modes that deliver great results, whatever the dish.

# Why choose Bosch?

## Even heat. Maximum flexibility.

Thanks to 4D Hotair, you can place your food on any of the four shelf levels and the results will be consistently perfect. Our new fan wheel makes it possible: it changes the direction of rotation during operation to distribute heat evenly on every level. And that's not all: with 4D Hotair, you can also bake and roast on up to four different levels simultaneously. For reliable results from top to bottom.

## Same results cooked with less energy.

Hotair Eco is a version of Hotair cooking, the most commonly used heating mode in homes. Thanks to special temperature controls, your oven is never a single degree hotter than necessary and uses up to 30% less energy. This makes our ovens great for precision cooking on a single baking level – ideal for cakes, casseroles, meat dishes, frozen foods, and much more.

## Save energy by choosing the right kind of heat.

In addition to classic top and bottom heat, Serie 8 ovens feature Top and Bottom Heat Eco, a new eco-friendly mode for extremely efficient operation. Prepare perfect sponges, cakes, delicate pastries, bread and rolls while saving valuable energy.

## Taste the difference.

Our drying heating mode is a healthy alternative to buying dried fruit from the supermarket. Whether you want dried apples for muesli or dried tomatoes for antipasti – your oven has it covered. You'll taste the difference – and can be sure that additives never reach your plate.

## Everything you need at your fingertips.

Our new, intuitive **control wheel** makes cooking easier than ever. With just a small turn of the stainless steel wheel, you can adjust any of your oven's settings, giving you full control over your dishes at all times with the perfect end result.

## Gently does it.

No crash, no bang, no wallop. A busy kitchen doesn't need to be a noisy one. By integrating a hidden mechanism into our ovens, we have created **SoftClose** and **SoftOpen** Doors that gently, quietly and safely close. Another simple and stunning addition to our ovens that makes them simply more stunning.

## At last, something in the kitchen that will clean itself.

The **EcoClean Direct** special coating of microfine ceramic particles on the interior walls absorbs grease and residue, breaking them down via oxidation. All you need to do is wipe the bottom and inside of the glass door for a brilliantly clean oven.

## Full steam ahead – for full taste.

Dishes can turn out even better if you add a little bit of moisture from time to time. That's exactly what our **added steam** function on single ovens does; for juicy meat with crispy skins and perfectly browned breads with the perfect crust.

# How do I choose the right oven?

The kitchen lies at the heart of every home, so it makes sense to consider all the options carefully when it comes to buying a new or replacement oven. There are many types to choose from, including single, double, multifunction, combination and steam. By answering some of the most common questions below, you should be able to quickly identify the right oven that will deliver exactly what you want. To help you choose the right oven for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

**Q: How can I use my oven more efficiently?**

A: By selecting the right programme, depending on what and how you are cooking, you will be able to ensure you can reduce your energy consumption with no impact on the end cooking result. For example, if you are cooking a one shelf meal – such as lasagne, pies or a casserole – select Hotair Eco and you will use up to 30% less energy\*. When you roast meats, select the Hotair grilling function which has a rotisserie effect and uses 35-40% less energy than traditional roasting.

**Q: Will the oven I choose meet all my cooking needs?**

A: Yes. When you cook with a Serie 8 oven and experience the PerfectBake and PerfectRoast functions, there is almost no limit to what you can do. The combination of these two sensor-controlled functions ensures that your oven always knows exactly how your dish is progressing. It sets the optimal heating mode, temperature and cooking time accordingly. Every dish, from roast beef to lemon pie, is cooked to perfection, so you no longer need to constantly check on their progress – unless you can't help but admire the cutting-edge technology at work.

**Q: What are the benefits of a compact appliance?**

A: Compact appliances are a great alternative to double ovens if the second oven offers little functionality. As well as being multifunctional, your compact appliance has been designed to perfectly complement\*\* the single oven you choose – giving your kitchen a stylish finish, especially when also paired with warming drawers and coffee machines. Our compact appliance range includes microwaves, microwave combinations and steam ovens.

\* 30% more economical (0.66kWh) than the maximum value (0.99kWh) allowed for energy efficiency class A (measured in accordance with EN 50304).

\*\* Use models from the same range group (e.g. Serie 8) together for optimum coordination. For side-by-side oven and compact installation, use only the HBG78R950B single oven.

**Q: What other useful features might I need?**

A: Whilst many of us love cooking, few of us look forward to cleaning the oven afterwards. But this chore has been made redundant for anyone choosing a Bosch pyrolytic oven. Selecting the pyrolytic self-cleaning cycle heats the oven to 480°C and after cooling down, all you need to do is simply wipe away any spillages that will have been reduced to ash. Ovens with EcoClean liners and an EcoClean self-cleaning programme also reduce the amount of elbow grease you need to use to keep your oven in showroom condition – though not as effectively or as easily as the pyrolytic self-cleaning cycle.

**Q: What does a steam oven offer that a conventional oven doesn't?**

A: Steam cooking locks in more nutrients (vitamins and minerals), as well as more flavour, so food is often tastier if steam cooked. Some Serie 8 ovens have special programmes and functions that combine the best of a steamer with all the benefits of a full-size classic oven. Those ovens equipped with the steam function produce succulent roasts, with juicy meat and crispy skin, as well as breads with the perfect colour and crust. As you'd expect from any Bosch appliance, they are also easy to operate and clean.

# Choosing the right cooking programme.

Our modern ovens offer a range of specialist programmes designed to ensure ideal conditions and perfect end results, whatever you're cooking.

## **Defrost.**

Meats, bread, cream cakes and other foods defrosted more evenly than a microwave.

## **Pizza setting.**

Get an authentic pizza – crisp base and moist topping. Also great for quiches, tarts and frozen foods.

## **Hydrobaking.**

Locks the moisture into the oven cavity for perfectly moist bread and cakes.

## **Plate warming.**

Pre-heated crockery keeps food warmer for longer – making every meal a little more special.

## **4D Hotair.**

Place your food on any of the four shelf levels to achieve consistently perfect results thanks to the new fan wheel that distributes heat evenly.

## **3D Hotair cooking.**

By maintaining the right temperature across all three shelf levels, consistently even cooking results are achieved.

## **Hotair Eco.**

For all those times you cook using just one shelf level, Hotair Eco gives perfect results and uses up to 30% less energy\*.

## **Hotair grilling.**

By operating alternately, the grill and fan create a rotisserie effect, perfect for creating crisp meats and poultry, while using up to 50% less energy than traditional roasting.

## **Intensive heat.**

Extra heat from below without pre-heating – perfect for flans or when using tin, porcelain or glass containers with poorer heat conductivity.

## **Bottom heat only.**

Only the bottom element is heated – ideal for pastry cases, bain-marie cooking and reheating.

## **AutoCook.**

Automatic cooking programmes that work out the time, temperature and shelf position for you.

## **Fast heat.**

Pre-heats the oven approximately 30% faster when you need to get cooking in a hurry.

\*30% more economical (0.66kWh) than the maximum value (0.99kWh) allowed for energy efficiency class A (measured in accordance with EN 50304).

# Cook. And clean. At the touch of a button.

Easy to use and easy to maintain. This oven has a range of programmes designed to achieve outstanding results, and cleaning is even easier as the oven cleans itself with pyrolytic self-cleaning.

Serie 8 single oven **HBG6764S1B**

- High resolution TFT-touch display with direct select TouchControl buttons
- Electronic clock timer with automatic on/off programmer
- Pyrolytic self-cleaning
- SoftClose and SoftOpen door
- PerfectRoast meat probe
- PerfectBake sensor
- 5 shelf levels
- 71 litres
- 13 functions

Save time and make cleaning the oven a pleasure instead of a chore with pyrolytic self-cleaning.

#### **Gently does it.**

It's all in the detail. The **SoftClose** and **SoftOpen** door mechanism controls the close action of the door so it closes gently, quietly and safely, without slamming shut.

#### **Easiest way to clean your oven.**

The ultimate in self-cleaning power. **Pyrolytic self-cleaning** heats the oven up to around 480°C, which reduces dirt and grease deposits to dust that can easily be wiped away.

#### **Put a new spin on your cooking career.**

You'll always have a complete overview and full control of all your oven's functions. The intuitive control wheel and full-width, high-resolution clear-text **TFT-touch display** with **direct select TouchControl-buttons** make operating our ovens a breeze. Clear, vivid images and helpful prompts guide you through each step as you navigate through the various programme options.

# The little oven with big ideas.

Offering the same functionality as a traditional oven, compact ovens with integrated microwaves also offer the speed of microwave functions for faster cooking when needed. There's extra versatility with the steaming programme and the pyrolytic self-cleaning programme means it cleans up afterwards too.

Serie 8 compact oven with microwave  
**CNG6764S1B**

- High resolution TFT-touch display with direct select TouchControl buttons
- Electronic clock timer
- SoftClose and SoftOpen door
- 3 shelf levels
- 45 litres
- Pyrolytic self-cleaning
- 14 functions
- BoschAssist
- PerfectRoast meat probe
- PerfectBake sensor

Choose a single oven and compact oven with microwave for extra space and flexibility.

#### Large capacity.

The compact oven with microwave is ideal if you are pushed for space, as it still functions as an oven and has a **45 litre** capacity with 3 shelf levels. It's bigger than the second oven on a double oven, so rather than opting for a double oven, choosing a single oven and compact oven with microwave will give you extra space and give you the flexibility with its wide range of programmes.

#### Best of both.

The wide range of functions mean that it's like having a fast second oven. With more capacity than the second oven on a double oven, this compact packs in fast microwave programmes as well as normal oven programmes.

#### Cleaning made easy.

The easiest way to clean the oven. **Pyrolytic self-cleaning** heats the oven up to around 480°C, which reduces dirt and grease deposits to dust that can easily be wiped away.

# Steam it, bake it, warm it and clean it.

For tastier, more nutritious food, this versatile compact appliance brings loads to the table and is easy to clean.

Serie 8 steam combination oven **CSG656BS1B**

- **High resolution TFT-touch display with direct select TouchControl buttons**
- **SoftClose and SoftOpen door**
- **EcoClean Direct**
- **3 shelf levels**
- **47 litres**
- **12 cooking functions**
- **Steam cooking**  
*gentle cooking*
- **Combination cooking**  
*hot air and steam*
- **Cleaning programme**  
*easy cleaning*
- **Descaling programme**  
*easy maintenance*

Achieve food that's desirably juicy on the inside and beautifully crisp on the outside with steam cooking.

**Taste the difference.**

By cooking food more gently, our steam oven locks in more of the natural vitamins and minerals. So it doesn't just taste better, it's healthier too.

**Hot air and steam, a recipe for success.**

**Combination cooking** combines steam with hot air so you can cook a wide variety of food, such as bread, meat and fish for instance, keeping them moist on the inside but brown and crispy on the outside.

**Steam through the cleaning.**

While the oven bakes or roasts, the special direct coating of microfine ceramic particles on its interior walls absorbs grease and residue, breaking them down through oxidation. All you need to do is wipe the bottom and inside of the glass door.

- 2 cooking functions
- 2 shelf levels
- Oven Capacity: 35 litres
- Energy efficiency class: B

## Compact steam ovens.

Serie 8 compact oven  
**CBG675BS1B**

- TFT touch display with direct select buttons
- SoftClose and SoftOpen door
- Intuitive control wheel operation
- 13 cooking functions
- Oven capacity: 47 litres

Serie 8 compact steam oven  
**CSG656BS1B**

- TFT touch display with direct select TouchControl buttons
- SoftClose and SoftOpen door
- Intuitive control wheel operation
- 12 cooking functions
- 4D Hotair  
*even cooking on 4 shelf levels*
- 3 shelf levels
- 12 cooking functions
- Oven capacity: 47 litres

Serie 8 compact steam oven  
**CDG634BS1**

- TFT touch display with direct select buttons
- SoftClose and SoftOpen door
- Intuitive control wheel operation
- Added steam function
- 4 shelf levels
- Oven capacity: 38 litres
- Water tank 1.3 litre

## Compact ovens with microwave.

Serie 8 compact oven with microwave  
**CNG6764S1B**

- TFT touch display with direct select TouchControl buttons
- SoftClose and SoftOpen door
- Intuitive control wheel operation
- BoschAssist
- Pyrolytic self-cleaning function
- 12 cooking functions
- Oven capacity: 45 litre capacity
- Water tank 1 litre

Serie 8 compact oven with microwave  
**CMG656BS1B** brushed steel  
**CMG656BB1B** black

- TFT touch display with direct select TouchControl buttons
- SoftClose and SoftOpen door
- Intuitive control wheel operation
- 6 cooking functions
- Oven capacity: 45 litre capacity

Serie 8 compact oven with microwave  
**CMG633BS1B**

- TFT touch display with direct select buttons
- SoftClose and SoftOpen door
- Intuitive control wheel operation
- 6 cooking functions
- Oven capacity: 45 litre capacity

## Coffee machine and warming drawers.

Serie 8 compact coffee centre  
**CTL636ES1**

- TFT display with interactive menu
- **MyCoffee: Save 8 favourite beverages with individual names and adjustable mixing ratio of milk and espresso**

Serie 8 warming drawer  
**BID630NS1B**

- **4 functions: dough proving, defrost, hold warm, plate warming**
- **Easy to clean toughened glass heating plate**
- **Can accommodate up to:**
  - 40 plates
  - 192 espresso cups
- **Adjustable temperature range from 40-80°C**
- **Maximum weight capacity 25kg**
- **Drawer interior volume: 52 litres**

Serie 8 warming drawer  
**BIC630NS1B**

- **4 functions: dough proving, defrost, hold warm, plate warming**
- **Easy to clean toughened glass heating plate**
- **Can accommodate up to:**
  - 12 plates
  - 64 espresso cups
- **Adjustable temperature range from 40-80°C**
- **Maximum weight capacity 25kg**
- **Drawer interior volume: 20 litres**

## Microwaves.

Serie 8 compact microwave oven  
**BEL634GS1B**

- TFT colour and text display with direct select buttons
- Auto cook programmes
- Automatic programmes
- Oven capacity: 21 litres
- Max. power: 900W

Serie 8 compact microwave oven  
**BFL634GS1B** brushed steel  
**BFL634GB1B** black

- TFT colour and text display with direct select buttons
- Auto cook programmes
- Stainless steel control wheel
- Touch controls
- Electronic clock timer
- LED light
- Max. power: 900W

Serie 6 compact microwave oven  
**HMT84G654B**

- **3 weight automatic cooking programmes**
- **4 weight automatic defrost programmes**
- **1 weight automatic combination programme**
- **1 memory function**
- **Oven capacity: 25 litres**
- **Maximum microwave power level: 900W**

## Microwaves.

Serie 6 compact microwave oven  
**HMT84M654B** brushed steel  
**HMT84M664B** black  
**HMT84M624B** white

- Electronic clock timer
- 4 weight automatic defrost programmes
- 1 memory function
- Oven capacity: 25 litres
- Maximum microwave power level: 900W

Serie 6 compact microwave oven  
with grill **HMT75G654B**

- Electronic clock timer
- 1 weight automatic combination programme
- 4 weight automatic defrost programmes
- 1 memory function
- Oven capacity: 20 litres
- Maximum microwave power level: 800W

Serie 6 compact microwave oven  
**HMT75M654B** brushed steel  
**HMT75M664B** black  
**HMT75M624B** white

- Electronic clock timer
- 4 weight automatic defrost programmes
- 1 memory function
- Oven capacity: 20 litres
- Maximum microwave power level: 800W

Serie 4 compact microwave oven  
**HMT75M551B**

- 3 weight automatic cooking programmes
- 4 weight automatic defrost programmes
- 1 memory function
- Oven capacity: 17 litres
- Maximum microwave power level: 800W

## Freestanding microwaves.

Compact microwave oven  
**HMT84M451B** brushed steel  
**HMT84M461B** black  
**HMT84M421B** white

- 25 litre capacity
- Maximum microwave power level: 900W
- 3 weight automatic cooking programmes
- 4 weight automatic defrost programmes
- 1 memory function

Compact microwave oven  
**HMT75M451B** brushed steel  
**HMT75M461B** black  
**HMT75M421B** white

- Can be installed under a wall cupboard
- 17 litre capacity
- Maximum microwave power level: 800W
- 3 weight automatic cooking programmes
- 4 weight automatic defrost programmes
- 1 memory function

Compact microwave oven with grill  
**HMT75G451B**

- 17 litre capacity
- Maximum microwave power level: 800W
- 1000W quartz grill function
- Microwave combination cooking
- 1 weight automatic combination programme
- 3 weight automatic cooking programmes
- 4 weight automatic defrost programmes
- 1 memory function

Compact microwave oven  
**HMT72M450B**

- Can be installed under a wall cupboard
- 17 litre capacity
- Maximum microwave power level: 800W

Compact microwave oven  
**HMT72G450B**

- 17 litre capacity
- Maximum microwave power level: 800W
- 1000W quartz grill function
- Microwave combination cooking

# Hobs.

There is a wide range of gas, induction and ceramic hobs to choose from. As you would expect from Bosch, all are made using high quality materials, are easy to use and add versatility, style and elegance to any kitchen.

## Serie | 8 ●●●●●

**Our premium range.**  
Convenience and elegant design combine to give you our Serie 8 hobs, allowing you to select individual cooking zones and power levels. All controlled at just the touch of a button with the modern touch control.

## Serie | 6 ●●●●○

**Our essential range.**  
Expect excellent operation and timeless designs with the Serie 6 hobs. You'll get premium engineering and materials so that you can always cook something a little bit special. Get ultimate control with the easy to use DirectSelect touch control.

## Serie | 4 ●●●○○

**Our practical range.**  
Featuring a range of electric and gas hobs that are convenient and simple to operate, our Serie 4 hobs maintain a classic design with control knobs at the front of the appliance.

## Serie | 2 ●●○○○

**Our quality range.**  
Our Serie 2 hobs offer you classic design with easy operation. They are the optimal solution for anyone who wants a reliable appliance with good value for money.

To view our full range of hobs, visit [www.bosch-home.co.uk](http://www.bosch-home.co.uk)

Induction hobs

Gas hobs

Ceramic hobs

Domino hobs

# Which type of hob should I get?

Your hob is likely to be used as much as, if not more than, your oven. To help you choose the right hob for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

**Q: Which type of hob is the fastest?**

A: Induction hobs are the fastest. They can boil liquids nearly twice as fast as gas\* and nearly three times faster than ceramic electric hobs.

**Q: Which is the most energy efficient?**

A: Whilst gas is cheaper to use than electricity, a lot of the heat is wasted. Induction hobs only heat the area in contact with the base of the pan and, as they heat the contents faster, they are also the most energy efficient way of cooking.

**Q: Which is the easiest type of hob to install?**

A: Gas hobs need to be installed by a registered gas engineer and most electric hobs need to be installed by a qualified electrician. At Bosch, however, we have one induction hob (product code P1A611B68B) that can be installed as simply as plugging in any electrical appliance.

**Q: Are there any differences in the design or style of the hobs?**

A: Yes. Induction and ceramic electric hobs have contemporary touch controls, whereas gas hobs have dial controls. Within gas hobs there are a wide selection of designs and materials, including tempered glass bases and brushed steel bases, as well as different colours.

**Q: Do I need any special pots or pans?**

A: All pots and pans are suitable for use on ceramic electric or gas hobs. Induction hobs require special 'ferrous pans' as these are magnetic, which is what makes induction heat work. If you're not sure if your existing pans are ferrous, simply hold up a fridge magnet to the base of the pan and if it sticks, you can use it on an induction hob.

**Q: Which is the easiest type of hob to clean?**

A: Because induction hobs only heat the base of the pan, the glass around the zone remains cool so any spillages do not burn on and can simply be wiped away. We have made many of the pan supports on our gas hobs dishwasher safe, so if you prefer cooking with gas then this saves you time and effort in keeping the supports clean.

\*Based on time required to heat 2 litres of water at 15°C to 90°C using Bosch hobs.

# Twice as fast as gas.

Induction hobs can heat food and boil water nearly twice as fast as gas and three times faster than ceramic hobs\*. And as they're also more energy efficient, you'll save money as well as time.

\*Based on time required to heat 2 litres of water at 15°C to 90°C using Bosch hobs.

# Why choose Bosch?

As well as reducing cooking times and increasing your control, induction is a more intelligent heat source. Rather than using heating elements under the glass to heat the pan, induction actually heats the base of the pan - this means the hob glass around the cooking zone remains cool to touch. Any spillages are therefore more easily dealt with as they don't burn on and can be simply wiped away.

## More control at your fingertips.

Set the correct temperature with a single touch thanks to **DirectSelect**. No more scrolling up or down, just simply press one button to select the right heat level.

## Express cooking.

Induction cooking with a turbo boost. The **Boost function** allows you to increase the power of the cooking zone by 50% - perfect for large pots and pans or when you're in a hurry.

## Clean up in an instant.

In case of any spills, simply select the **Freeze function** which freezes all the heat settings so you can thoroughly wipe and clean the hob surface. To restore the previous heat settings simply touch the button again!

# Cooking that's designed around you.

Ultimate flexibility with our new FlexInduction hob. One, two or three pots, or even a large casserole: the new Bosch **FlexInduction** leaves it up to you. At the flick of a switch, you can combine two induction zones into a large induction surface on which you can cook the way you want.

Serie 8 FlexInduction hob with DirectSelect  
**PIZ975N17E**

- **5 Induction cooking zones:**  
2 x FlexInduction zones,  
each with 2 Induction zones,  
1 x central triple zone
- **17 power levels**
- **DirectSelect Plus**  
*for easy operation*
- **Boost setting for all zones**  
*extra power*
- **Freeze function**  
*freezes the settings*
- **Timer for all zones**  
*stay in control*
- **2 stage Hh residual heat indicator for each zone**  
*extra safety*
- **Profile trim**

FlexInduction is great for roaster pans and poaching as well as large grill pans.

**Save time.**

Nearly three times faster than ceramic and twice as fast as gas, **induction** cooking wins hands down when it comes to cooking with speed.

**Easy to use.**

Giving you ultimate control, the **DirectSelect** control panel allows you to choose the heat setting straight away without having to move through the range.

**Easy to clean.**

**Automatic pan recognition** only heats up the base of the pan and not the rest of the zone, which doesn't waste energy and leaves the rest of the hob cool to touch. Keeping the hob cooler makes it safer and also prevents spillages from burning on so it's easy to clean.

# Why choose Bosch?

## **Chef's recommendation.**

The hob of choice in most professional kitchens, modern gas hobs are as stylish as they are practical. Our German-designed gas hobs are available in a range of different colours and styles, and come with cast iron pan supports that are either front or side mounted. With ignition built-in to the controls, all it takes is one action to ignite and set the hob to the correct cooking level.

## **A touch of the Orient.**

Powerful, dual ring **wok burners** are perfect for oriental cooking. They deliver a boost both in power and speed, but can also be used very effectively at lower settings when required.

## **Safety you can rely on.**

A **Quick Stop main switch** allows all gas burners on the hob to be turned off quickly and locked if needed, for instance if you have to answer the phone or door.

# Now you're cooking on gas.

Professional performance, stunning good looks and ultimate control.

A gas hob delivers instant heat and is easy to adjust and control, making it a favourite in professional kitchens up and down the country.

With a wide selection of widths and finishes to choose from, a gas hob can add as much stylish elegance as practical functionality to any kitchen.

# Wok and roll.

Stunning good looks and clever design combined with the ultimate control of gas cooking, deliver a professional performance.

Serie 6 gas hob **PPS816M91E**

- **1 wok style burner**  
*for high speed cooking*
- **Quick Stop main switch**  
*cuts off all burners*
- **Ignition via controls**  
*one hand ignition*
- **Flame failure safety device**  
*cuts off gas should flame go out*
- **Suitable for flush or surface mounting**
- **Tempered glass base**

Smart design and ultimate control with gas.

**Smart design.**

**Square design pan supports** don't just look good, but provide more stability for pots and pans. Cleverly designed to fit together, they are separate pieces which make them easy to handle and clean. The elegant **tempered glass** base allows for a choice of surface mounting for quick and easy installation, or flush mounting which gives a continuous sleek worktop effect.

**Easy to control.**

Front mounted controls are more easily accessible and ignition is built into the dials, so you can ignite and power the hob in one action, making it even easier to control the hob.

**Wok style burner.**

Powerful **wok style burners** produce extra power, which is perfect for the high-speed cooking required in oriental foods.

# Hoods.

Offering a blend of function and form, Bosch hoods deliver quiet, effective extraction that makes the kitchen and home a more pleasant environment. Either match them to the interior style with a bold design statement, or complement a more minimalist look with an integrated model.

## Serie | 8 ●●●●●

### **Our premium range.**

Advanced design standard and functionality to fit perfectly in your kitchen. Experience maximum operating convenience with DirectSelect control and as you would expect from Bosch, high quality craftsmanship combined with cutting-edge technologies.

## Serie | 6 ●●●●○

### **Our essential range.**

Ultimate convenience and tasteful design make Serie 6 cooker hoods an asset to any stylish kitchen. Electronic controls give you ease of use.

## Serie | 4 ●●●○○

### **Our practical range.**

As the centre of family life, the kitchen needs to have a comfortable atmosphere free of cooking steam and disruptive noise. The Serie 4 cooker hoods are extremely quiet, easy to operate and impressive with their modern design.

## Serie | 2 ●●○○○

### **Our quality range.**

Offering you classic design with simple mechanical operation the Serie 2 cooker hoods are the optimal solution for anyone who wants a reliable appliance with good value for money.

To view our full range of hoods, visit [www.bosch-home.co.uk](http://www.bosch-home.co.uk)

Island hoods

Flat glass hoods

Curved glass hoods

Angled hoods

Integrated hoods

## Why shout when you can whisper?

Relax in a quieter kitchen with family and friends.

The motors in all of our hoods need to deliver powerful performance for maximum extraction, but that doesn't mean your home environment has to suffer. We have designed state-of-the-art motors in most hoods that generate noise levels of just 45 decibels\*, which is about the same level of sound as a quiet conversation. And our quietest model delivers a library quiet peacefulness of just 40 decibels\*\*.

\* (45dB(A) re 20µPa sound pressure).

\*\* (40dB(A) re 20µPa sound pressure).

Controls on actual model may vary, check [bosch-home.co.uk](http://bosch-home.co.uk) for details.

## Why choose Bosch?

### Let there be light.

High or low voltage spots create an attractive, bright, even illumination of your cooking area, with the added advantage of lasting longer than standard bulbs.

### Fresh thinking.

**Metal grease filters** efficiently filter grease and other solid particles out of the extracted air. To make sure they operate at maximum efficiency, they should be cleaned around twice a month by hand or in the dishwasher.

### Designer looks.

The filter is concealed behind a stylish **brushed steel cover** with a brushed steel handle to hide grease build up, for a really sleek finish.

# A cooker hood design for every kitchen.

With a wide variety of sizes, types and finishes to choose from, it's easy to find the right cooker hood to perfectly match your kitchen.

Model shown is DWB06W452B/DWW06W450B.

**Island.**

A stylish choice designed to perfectly complement an island hob installation.

**Box style.**

Chimney hoods in a box design are available in slim or super-slim versions. Included in the range are models with beveled lower edges for a really super-slim appearance.

**Angled.**

The angled design doesn't restrict headroom.

**Curved glass.**

Metal and glass for a contemporary look, curved to give smooth lines.

**Flat glass.**

A linear design in contemporary materials for a stylish kitchen.

**Pyramid.**

Impress with classic lines and gently inclined contours.

**Canopy.**

Designed to be fully integrated in cabinets/chimneys and is therefore never seen.

**Telescopic.**

Extends when in use and slides neatly away when not in operation.

**Integrated.**

Pull out when in use and close to neatly conceal when not in operation.

**Conventional.**

Mounted under cabinets and always visible, allowing you to keep your storage space.

# Selecting the right hood for your kitchen.

If you love cooking at home, you'll know that an effective extraction method is needed to help get rid of moisture and remove odours, so that your kitchen and other areas of the home remain pleasant, relaxing environments. The short guide below takes you through the key factors you should consider when purchasing any new cooker hood. To help you choose the right hood for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

**Q: What types of hoods do you offer?**

A: All Bosch cooker hoods offer extraction and recirculation.

**Extraction**

Ducting out is the most effective method of extraction but means the hood needs to be set on an outside wall, or have access to one. Air is then ducted out through a small outlet of up to 150mm diameter.

**Recirculation**

If ducting out is not possible, the hood can be purchased with a recirculating kit accessory. This works by extracting odours and grease and then returning purified air to the room. By using both charcoal and grease filters, recirculation is still an effective method of removing odours and moisture.

**Q: What type of controls are available?**

A: Our new built-in range of cooker hoods feature the DirectSelect touch control panel, also found on our dishwashers and hobs. This design match control offers various intensity levels and lighting right at your fingertips. Other controls available include rocker switches and push buttons. You should have no trouble matching the buttons and fascia of your preferred cooker hood to the rest of your kitchen.

**Q: What type of filters can I choose and how often do I need to clean them?**

A: We have three main types of filter:

**Metal grease filters**

Metal grease filters efficiently remove grease and other solid particles out of the air. Like most of our filters, they need to be cleaned about twice a month to keep them operating effectively.

**Brushed steel filters**

We also have standard metal filters which are located behind a stylish brushed steel cover. This hides grease and keeps the finish of the hood sleek.

Telescopic hoods have an indicator light that comes on when the filters need to be cleaned. If you have a hood that uses recirculating, the charcoal filters will need to be replaced from time to time.

**Q: Do I need to think about lighting?**

A: Yes, definitely. Many of our cooker hoods now come with energy efficient LED lighting that can be adjusted for bright or lower illumination depending on your activity in the kitchen. Good lighting on the hood helps illuminate the cooking area. As well as LED strip lighting, some models have low energy halogen lights. Also discover dimmer switches that provide greater control on light levels, such as bright for when you're working in the kitchen and softer lighting to create a more relaxed mood for meal times.

# Built with a sixth sense for saving.

Our most energy efficient hood ever. The brushless friction-free motor and energy saving LED lights reduce energy consumption by 82% compared to a similar five-year-old model, without compromising results.\*

Serie 8 Island hood **DIB091U51B**

- **Electronic control**
- **Electronic power level display**
- **Grease and charcoal filter saturation indicators**
- **EcoSensor**
- **Designed for ceiling mounted installation**
- **Height adjustable chimney sections**
- **Soft touch button control for extractor speeds and light**
- **3 power levels and 2 intensive settings**
- **Automatic intensive revert**
- **LED lights**
- **Softlight dimmer function**
- **Fluorescent mood lighting**
- **Additional noise reduction insulation**
- **3 removable metal grease filter cassettes**

\*Same power setting, same extraction rate, halogen lights.

Our hoods deliver maximum performance whilst using minimal energy.

**Energy saving. Thinking inside the box.**

Our EcoSilence Drive brushless friction-free motor and energy saving LED lights reduce energy consumption by up to 80% compared to a similar five-year-old model, without compromising results.\*

**In this light, even your electricity bill looks good.**

Energy efficient **LED lighting** can be adjusted for bright illumination to work under, or lower illumination for ambient mood lighting in the kitchen. High-efficiency LED lights make both your kitchen and energy bill look good – especially over the hood's lifetime with a 40-year service life.

**Your 'second nose' in the kitchen.**

The **EcoSensor** regulates the extraction power of the cooker hood. Every few seconds it analyses the vapour intensity of the cooking and adjusts the power level automatically, so you can concentrate on your cooking rather than worrying about whether your hood is on the right setting.

\*Same power setting, same extraction rate, halogen lights.

Washing machines

Washer dryers

Home laundry

# We take the chore out of laundry.

Because we care that our appliances are both as efficient as possible to protect the environment and as convenient as possible to make your life easier, a Bosch washer dryer can wash and dry almost double the amount of laundry per load (4kg) than a standard washer dryer (2.5kg).

Model shown is WIS28441GB.  
Illustration only. Actual model may vary.

# Why choose Bosch?

This means you can keep on top of the laundry basket, spend more time doing things you really love, and know that every time you put a washload on you're saving water and energy.

The Serie 8 washer dryer uses just 79 litres of water to wash and dry a 4kg load. A standard washer dryer uses 100 litres to wash and dry a 2.5kg load. This means you can get twice the laundry done and get on with the more exciting things in life whilst saving water.

## **Washed and dried to perfection.**

Programme a wash and dry in one go. Thanks to advanced **sensor drying**, load the machine and you'll come back to perfectly dry clothes. Plus, the programme automatically turns off once the sensors detect the laundry is dry, so you'll save energy and minimise the risk of damage through over-heating.

## **Give your laundry a boost.**

When you need lightly soiled items more quickly, press the **Flexi Time** button once to reduce the wash time by 30% without compromising the cleaning performance. And for very lightly soiled items, pressing it twice speeds it up faster still.

## **Wash more, iron less.**

On both washing machines and washer dryers, the **reduced ironing** function delivers a gentler tumble during the spin cycle. As a result, your clothes come out less creased, which makes ironing them a lot quicker and easier.

## **Hand wash in the machine.**

The **woollens hand wash programme** is so gentle that even the most delicate laundry can now be conveniently washed in the machine. It has a soft wash action and a specialised reduced spin of just 27rpm so hand wash items keep their shape.

# How do I choose the perfect washing machine?

You rely on your washing machine to keep pace with your family's laundry needs and to make sure your clothes always come out looking as good as the day you bought them, so it pays to spend a little time making sure you get the right one for your lifestyle. To help you choose the right washing machine for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

**Q: What size drum should I choose?**

A: Machines with larger drums can take 7kg+ of washing. A typical 7kg load is made up of 35 men's shirts, or king size bed linen including 4 pillow cases. A 2kg load is typically made up of 10 men's shirts or the clothes you'd wear in a normal day. If you need to wash larger loads, consider a machine with at least a 7kg capacity.

**Q: Can you save me time?**

A: No-one wants to spend more time doing the laundry. And for the really time-pressed, we've created a 15 minute Super Quick 15 programme that still delivers perfect results.

**Q: Do I need all of these programmes?**

A: If you've invested a lot of money in your clothes or household linens, you can easily avoid destroying or damaging them by choosing the machine with the most programmes in your budget. Hand wash, delicates, silk, woollens, sports or other specialist programmes give the best possible care to specific items.

**Q: What detergent gets the best results?**

A: All detergents – when used with correct dosage – deliver good results. Powders and gels give more flexibility to get dosage levels correct, whereas tablets and liquitabs are more convenient. Liquids dissolve quickly and give good results at lower temperatures.

**Q: Do I need to sort the laundry?**

A: You should always sort your laundry by colour and care type and try washing similar colours and fabrics together. Spending a small amount of time sorting your laundry will ensure you get better washing results.

**Q: How do I know which spin speed to choose?**

A: Many machines allow you to change the speed of the spin on certain programmes. Higher spin speeds mean more moisture is spun out of the load and your clothes dry faster – handy if you need them in a hurry.

**Q: How do I know it's exactly right for my home?**

A: Whether you or your family members have allergies, play lots of sport, wear delicate clothing or have other specific needs, you can usually find a machine that can cope with whatever you throw at it. Most machines now come with a child lock on the door and control panel to protect them from wandering little fingers.

# Never miss out on wearing your favourite outfit again.

Everything that you need to take care of your family's laundry, from large capacity for large loads, to a range of programmes for different fabrics, and a quick 15 minute programme for when you need your washing quickly.

Serie 8 washing machine **WIS28441GB**

- **1400rpm**
- **Super Quick 15**  
*15 minute wash programme*
- **3D AquaSpa wash system**  
*faster water penetration*
- **Reduced Ironing**  
*less creasing*
- **Wool programme**  
*gentle washing*
- **Large LED display**  
*stay in control*
- **Time delay/Time remaining**  
*flexible laundry*

Ideal for families and busy households, the large 7kg capacity means you can wash more laundry in one go.

**Wash more laundry.**

Ideal for families and busy households, the large 7kg capacity means you can wash more laundry in one go. A typical 7kg load could be made up of king size bed linen, including 4 pillow cases or 35 men's shirts. So whether you have lots of laundry that needs washing, or you prefer to do fewer loads but with larger amounts, large capacity will make laundry easier.

**Easy to use.**

The large **LED display** allows you to select programmes, add options easily and monitor you laundry's progress so you can stay in control of your laundry.

**Extra convenience.**

**Time delay** allows you to delay your washing so it's ready when you need it to be. You can keep adding to it throughout the day and run it at night – ideal for making the most of night time tariffs.

# Load. Close. Press. The simplest way to clean and dry laundry.

The Serie 6 washer dryer uses just half the water consumption of a standard washer dryer, and washes and dries almost double the amount of laundry.

## No more hanging around.

Intelligent sensor electronics take the guess work out of drying your laundry. **Autodry** monitors your laundry and switches the programme off once your laundry is dry. You can programme a wash and dry in one go and come back to perfectly washed and dried laundry.

## Save time.

**Super Quick 15** turns around a full wash in just 15 minutes. Designed for a lightly soiled 2kg load (that's roughly one outfit or 10 men's shirts), this cycle packs in a wash, two rinse cycles and improved rinse spinning making it one of the shortest complete wash programmes of any machine on the market.

## At your command.

The simple but effective **time delay** allows you to delay your laundry so it is washed and dried for when you want it. Ideal for taking advantage of cheaper energy tariffs.

Serie 6 washer dryer **WKD28540GB**

- **1400rpm**

# Dishwashers.

Save more time, energy and water than ever before.

## Serie | 8 ●●●●●

### **Our premium range.**

A perfect fit in design and functionality. A new standard of flexibility with the VarioFlex Pro basket system and easy-to-read TFT displays indicate programme information, a real-time clock, resource consumption and fill levels. It is the most elegant and easiest way to achieve perfect washing results.

## Serie | 6 ●●●●○

### **Our essential range.**

Intelligent solutions that save water and energy. It's increasingly important to buy energy-efficient and sustainable appliances but that shouldn't compromise on its ease of use. Easy-to-read displays not only indicate the time remaining, but tell you when to add salt or rinse aid.

## Serie | 4 ●●●●○

### **Our practical range.**

High quality, reliable dishwashers offer flexibility and practicality with the Rackmatic height-adjustable top basket. A convenient display tells you the cycle time remaining, making chores around the house a little bit easier.

## Serie | 2 ●●○○○

### **Our quality range.**

Our Serie 2 dishwashers offer you classic design with easy operation. They are the optimal solution for anyone who wants a reliable appliance with good value for money.

To view our full dishwasher range, visit [www.bosch-home.co.uk](http://www.bosch-home.co.uk)

Semi-integrated dishwashers

Fully-integrated dishwashers

Slimline dishwashers

# Why choose Bosch?

## Where every pot has its place.

The new **VarioFlex Pro** basket system is even more versatile than before. Tailor the space inside of your dishwasher to suit exactly the items you're washing. The foldable racks adapt to any load whilst still securing everything in place.

## Not just a pretty face.

The new **TFT touch colour display** from Bosch clearly indicates which programme is being used plus the energy and water consumption for your chosen cycle. It will also tell you the programme finish time so you don't have to worry about opening the dishwasher door half way through a cycle again.

## Put the pressure on.

**Touchpoints** indicate where to hold the foldable racks and adapt their position, or adjust the height of the upper basket. Thanks to these markings, you can instantly spot how and where to modify the baskets so you always have the perfect solution for every combination of dishes.

## Take away the guess work.

Bosch dishwashers are so quiet sometimes it's hard to tell whether they are on or off, especially on fully-integrated models where there is no visible control panel. The new **TimeLight** indicates the programme status and time remaining onto any floor surface.

## 10-year anti-rust warranty

Our appliances are made from top quality materials and in addition to our standard appliance warranty, we provide a **free of charge warranty** against rusting-through of the dishwasher's inner cavity.

# Save water every load.

It takes just 6.5 litres\* of water for our AquaStar dishwashers to clean 13 place settings for a three-course meal\*\*. That's less water than it takes to fill a kitchen sink.

Our AquaStar 6.5L technology is available on selected Serie 6 dishwashers and as well as saving water, with their A++ rating for energy efficiency they can save you money on your energy bills too.

\* 6.5 litre water consumption on standard Economy 50°C programme.

\*\* Three-course meal as defined by dinner, soup and dessert plate, cup and saucer, glass, knife, fork, soup, tea and dessert spoons for each place setting as well as 1 serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

# How do I choose the right dishwasher for me?

Dishwashers save you the chore of washing-up by hand, and also help keep your kitchen looking cleaner and clutter free. We have two different sizes of built-in dishwashers you can choose from: standard or slimline. The slimline 45cm dishwasher is capable of washing a surprisingly large number of dishes using a wide range of programmes. To help you choose the right dishwasher for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

**Q: Which is the best cleaning method – by hand or in a dishwasher?**

A: Tap water used for hand washing is generally not a very high temperature, and washing up liquid is relatively mild because both come into contact with your skin. Dishwashers, on the other hand, heat water up to over 70°C which is more effective at removing bacteria, and dishwasher detergent contains different ingredients that target stains and food residues. Some of our dishwashers also have a Hygiene option, which uses a longer, hotter, final rinse for chopping and cooking utensils. In short, you'll get better results with less effort from a dishwasher than from handwashing.

**Q: How much space do I need for a dishwasher?**

A: Our range of slimline dishwashers are the same height and depth as full size models, but at 45cm across are just two-thirds of the width and perfect for slotting into narrow spaces. A slimline dishwasher will hold either 9 or 10 place settings. The full size models are 60cm in width and can hold 12, 13 or 14 place settings.

**Q: Which size is best for me?**

A: If you use a lot of dishes, for example if you have a large family or you regularly cook and entertain at home, you should consider a full size dishwasher as these can easily hold up to 13 or 14 three-course dinner place settings. Their flexible settings also allow you to use them for larger pots and pans, as well as delicate items such as glassware.

If you live on your own, or in a smaller household with limited space, then a slimline model might cope with all your dishwashing needs.

**Q: Will the dishwasher be able to replace the 'elbow grease' sometimes required to hand wash?**

A: Yes – your Bosch dishwasher has a range of programmes to make sure all your dishes come out brilliantly clean. For example, you can safely put delicate glassware at the top of the dishwasher and dirty pans at the bottom. The pans get an intensive clean and the glasses a gentler one with our Intensive zone programme. The programmes, which are explained in a little more detail on page 58, can also sense automatically how dirty the load is and adapt the wash accordingly.

**Q: Do I need to stack the dishwasher in a certain way to get the best results?**

A: To get the best results, we recommend larger dishes and tall items go in the bottom rack, with their dirty surfaces facing the centre and any openings facing down. The top rack should be reserved for smaller items, such as cups or glasses, or those that are less dirty. The top basket can be adjusted when fully loaded to create extra space if needed for taller or bigger items in the bottom rack. The racks that keep plates securely in place can also be folded down so you can get larger items or pans cleaned more easily. If you have a dishwasher with a VarioDrawer, then you can put all the cutlery in there, including large utensils and wide handled items. This gives these items a better wash and frees up space in the bottom basket as no cutlery basket is required.

**Q: What's the difference between semi integrated and fully integrated?**

A: Fully integrated dishwashers – either slimline or full size – are completely hidden behind the door for a seamless built-in look. Therefore you have to open the door to access the dishwasher controls. Semi integrated dishwashers are only available in full size models and have the control panel on display. This is a feature some people prefer as it means you don't have to open the cabinet to switch it on or select a programme.

**Q: Will I have to wait for ages for the dishwasher to finish every time?**

A: No. By activating the VarioSpeed and VarioSpeed Plus options, you can significantly reduce running times. Using this feature, our Serie 6 models will wash and dry a full load in just over an hour. Our Quick Wash 45 programme will wash a light load in just over half an hour.

**Bosch recommend Finish.**

Bosch have tested and recommend using Finish dishwashing products. For the ultimate clean and shine on all your dishes, plus added protection against glass corrosion, Bosch recommend new Finish Quantum Shine & Protect.

# Clean 13 full place settings in just 6.5 litres of water.

Our dishwashers can clean a full load of dishes with just 6.5 litres of water (that wouldn't even fill a kitchen sink). That's a starter, main and dessert for 13 people\* cleaned perfectly.

Serie 6 dishwasher **SMI65P15GB**

- **VarioFlexPlus baskets**  
*flexible loading*
- **6 programmes**  
*a wash for every load*
- **VarioSpeed**  
*faster wash times*

\*Three-course meal as defined by dinner, soup and dessert plate, cup and saucer, glass, knife, fork, soup, tea and dessert spoons for each place setting as well as 1 serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

**When you need the dishes sooner.**

**VarioSpeed** cuts programme time in half. This option is available on most wash programmes (except quick wash 45°) and still delivers the same great results. With this option, the Economy 50°C programme takes just over an hour and a half.

**Easy loading.**

Larger baskets and foldable racks make it easy to fit more in and to load everything securely. The **3-stage Rackmatic™ system** in the basket means you can move the basket up even when it's full to make it easier to add taller items in the bottom basket.

**2 washes in 1.**

Delivering an intensive 70°C wash on the bottom basket whilst the top basket carries on as normal. Selecting the **Intensive zone option** will clean baked-on pots and pans in the bottom basket, and delicate glasses and dishes in the top basket at the same time. There's no need to wash two loads or slip on the rubber gloves and wash the rest of the dishes up by hand.

# Refrigeration.

Save more, waste less. Our new range of fridge freezers save you money thanks to their energy efficiency ratings. They are also packed with innovative technology to keep your food fresher for longer, so you'll throw out less and save on your weekly shopping bill too. Use our buyer's guide on page 92 to find the right one for you.

## Serie | 8 ●●●●

### Our premium range.

Elegant design and perfect organisation, inside and out. Innovative features allow you to control temperature and humidity of your foods, keeping them fresher for up to three times longer.

## Serie | 6 ●●●○

### Our essential range.

Technology such as the HydroFresh drawers precisely control humidity levels, keeping fruit and vegetables fresher for longer. A high-resolution LCD display shows energy and temperature settings inside the appliance.

## Serie | 4 ●●●○

### Our practical range.

With optimised drawers to control humidity or temperature such as the CrisperBox for your groceries and the ChillerBox for meat and fish, you don't have to worry about keeping your food fresh, your fridge does it for you.

## Serie | 2 ●●○○○

### Our quality range.

Built to keep electricity costs down. With energy efficiency an increasing priority in homes, the Serie 2 refrigeration range is just as efficient as it is value for money.

# Why choose Bosch?

## Another job off the list.

Never worry about having to defrost the freezer again. The **NoFrost** system prevents the build up of ice by automatically initiating the defrost operation as required. This also helps to maintain the appliance's energy efficiency.

## Fresher for up to twice as long.

To keep fruit and vegetables fresher for longer, you need to store them at both the right temperature and humidity levels. The **HydroFresh™** drawer allows you to adjust and set exactly the right humidity level for the fruit and vegetables you have, so they stay fresher for up to twice as long.

## Extra safe storage at the touch of a button.

Activating the **SuperFreeze** function before you go shopping lowers the temperature for a short period, so anything new put in the freezer is frozen quickly. **SuperCool** on your fridge performs a similar task, keeping everything at the right storage temperature.

## Quietly does it.

As there could be many small, and larger, hands opening and shutting the fridge door, it's nice to know that we've integrated **SoftClosing** doors in many models. Smooth, controlled closing and no slamming means there's one less bang, crash or wallop to worry about at home. Plus the door cannot be left open inadvertently.

# Keep cool when the electric bill arrives.

365 days a year, 24 hours a day fridges and freezers are always on. In fact, they make up for around 17% of the electricity used in the home, or even more if it's a particularly old model.\*

That's why we design our fridges and freezers to be as energy efficient as possible, and we're proud to be able to offer so many energy efficient fridges and freezers right across our range.

It might seem odd to replace something that isn't broken but you may actually save by upgrading your fridge and freezer. Our A++ energy rated fridge freezers, which are available from our Serie 6 range, cost as little as £35\*\* per year in electricity.

\* Source: [www.sust-it.net](http://www.sust-it.net).

\*\* Based on KIS87AF30G using 226kWh as stated on the EU energy certificate at £0.154 per kWh.

# Finding the right fridge freezer for me.

Making the right choice of fridge freezer is crucial as it is going to be the most important, and most used, appliance in your kitchen. As well as available space, you also need to make sure the appliance fits in with the way you will feed yourself, family and friends. To help you choose the right fridge freezer for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

**Q. What's the first thing I should consider?**

A. The first thing to consider is: do you want more space in either your fridge or freezer? Built-in fridge freezers can offer various options, from a 50/50 split to the larger fridge, or a smaller freezer option with a 70/30 split. If you are replacing a fridge freezer additionally, it is important to measure the cabinet and door sizes to ensure they will fit your new fridge freezer. Ventilation is very important as a properly ventilated machine will be more energy efficient.

**Q. There are lots of different models with different capacities.**

**How do I know which is the right one for me?**

A. If you live on your own, in a small household or tend to eat out more than at home, then a built-in fridge with an ice box might be sufficient. If you buy a lot of frozen food products, or regularly cook and freeze a large amount of homemade food, then it probably won't be enough. Separate, taller appliances provide the most capacity, though a tall fridge freezer has the benefit of having as much capacity as two separate smaller models and is more energy efficient. If you live in a large household, you are likely to undertake a large weekly shop. Therefore you may need a large capacity model, such as an American-style fridge freezer.

**Q. What do all the functions mean – surely one fridge freezer is pretty much the same as another?**

A. Whilst they may all look the same, there are little changes inside – and those changes can make a big difference. A large part of any household budget is spent on the weekly food shop – so it's important that your food and drink is stored in optimum conditions to reduce the cost and frustration of having to throw things out unused. That's why we've developed specialist drawers like CrisperBox (for fruit and vegetables) and ChillerBox (for meat and fish) to keep food fresher for longer.

**Q. Do I need all these fancy extras?**

A. We don't design things to be fancy extras – we put them there because they make life easier. For example, SoftClosing Doors ensure that whoever closes the fridge, does so gently and quietly. By developing NoFrost technology, we save you the time and chore of defrosting the freezer. With no frost in the interior, we ensure the peak energy efficiency of the appliance is maintained, saving money on your bills too.

**Q. Should I pay much attention to energy efficiency ratings?**

A. Yes. Whichever model you choose, it will be on all day, every day and will be constantly using electricity that you will be billed for. Our A++ fridge freezers cost as little as £35 a year in electricity charges.

# Save time with flexible storage. And save money too.

Put away the weekly shop more easily, and get what you need faster too, thanks to height adjustable shelves and fully extendible drawers. And because this fridge freezer is rated A++ for energy efficiency, you'll save money as well as time.

Serie 6 fridge freezer **KIN86AD30G**

- **HydroFresh drawer™**  
 *fresher fruit and vegetables*
- **SuperFreeze**  
 *faster freezing*
- **SuperCooling**  
 *faster cooling*
- **Electronic temperature control**  
 *precise temperature control*
- **LED light**  
 *perfect illumination*
- **SoftClose door**  
 *smooth controlled door closure*

**Gently does it.**

The soft controlled closure of the door adds the finishing touch to this fridge freezer and keeps items secure in the door when it's closing. Also, the door cannot be inadvertently left open.

**No more defrosting.**

By preventing ice formation, **NoFrost** ensures the freezer will never need to be defrosted again. Not only does that save you time, but it saves energy because there's no ice build-up insulating the inside of the freezer, which makes it work harder.

**Double the freshness.**

The **HydroFresh vegetable drawer™** features a humidity controller which allows you to lock in moisture. This preserves vitamins and flavour in fruit and vegetables so they last up to twice as long. You save time by making fewer shopping trips, and as food lasts longer it's less likely to be thrown away.

# Save money 24-7 and save on trips to the shops too.

Costing less than £1.50 per month\* in electricity to run, this A++ fridge saves energy. It has lots of space, and the height adjustable shelves and fully extendible drawers make it easy to put the shopping away.

Serie 6 fridge freezer **KIR81AF30G**

- **Electronic LED display**
- **Freshsense – intelligent sensor technology**  
*precise temperature control*
- **HydroFresh – humidity controlled salad container**  
*keep fruit and vegetables fresh*

\*Based on KIR81AF30G using 116kWh as stated on the EU energy certificate at £0.154 per kWh.

**Soft closing door.**

The fridge door closes quietly, gently and safely, so items stay securely fastened in the door, helping to make things a little calmer in a busy kitchen. The controlled closure prevents the door from ever being left open.

**Fresher fruit and vegetables.**

The two vegetable drawers have rippled bases to allow air to circulate, keeping fruit and vegetables as fresh as the day you bought them for longer.

**Easier access.**

It's even easier to reach right to the back of the drawer because the telescopic rails allow the drawer to come all the way out.

# Cooling technology where the money savings stack up.

Costing less than £4 per month\* in electricity to run, this A+ freezer is high in space but low in running costs.

Serie 8 freezer **GIN38A55GB**

- **SuperFreeze**  
*faster freezing*
- **Electronic temperature control**  
*precise temperature control*
- **BigBox**  
*perfect for storing bulky items*
- **LED light**  
*perfect illumination*
- **SoftClose door**  
*smooth controlled door closure*

\*Based on GIN38A55GB using 311kWh as stated on the EU energy certificate at £0.154 per kWh.

**More space.**

Extra spacious with 5 drawers and 2 compartments, you will find it easy to fit everything in – perfect for busy households. The extra large **BigBox** is big enough for the Christmas turkey and any other large bulky items.

**No more defrosting.**

**NoFrost** technology prevents ice building up, ensuring the freezer will never need to be defrosted again. This saves you time and saves energy, because there's no ice inside the freezer making it work harder.

**Soft closing door.**

The freezer door closes quietly and gently, helping to make things a little calmer in a busy kitchen. No more incidences of the freezer door being left open.
